COMPANY PROFILE

On the move since 1998

Catlyn Environmental Services was modestly founded by Dale and Lynn Pike in 1998 as two-person operation with one truck. Since then we have grown from a new environmental services venture into an industry leader throughout Essex County. Our clients range from homeowners to several multinational corporations. The company provides a high level of waste clean up and disposal expertise, including industrial vacuuming, emergency spill response, water blasting, and the hauling and disposing of non-hazardous and hazardous waste. Catlyn's ability to adapt into a quality, professional company has been demonstrated through such efforts as its 24 hour emergency service hot line and Internet site.

Resources

The necessary equipment and workforce for

- Industrial Waste Removal
- Emergency Spill Response

Wet Vacuuming Service

(3000 gal capacity units)

- vacuuming and disposal of hazardous and non-hazardous liquid waste

Winner of the 2002
Business of Excellence
Award

Every business strives to expand and be as profitable as possible. Although expansion and profitability is one of their goals, they have other concerns as well. Catlyn cares about their customers and take pride in their expertise. They also care about the welfare of the environment. They continuously seek the latest in innovative technology to ensure their equipment and methods are conscious of environmental concerns. They are strides ahead of their competition and will continue to differentiate themselves in the future.

In a climate of "environmental awareness" Catlyn maintains a goal of assisting our Industrial, Commercial, and Residential Customers with the "preservation of our environment".
